Introduction

AUTHORITY AND SCOPE—The Economic Censuses are required by law under 13 U.S.C., sections 131, 191, and 224. The 1967 Census of Business portion of the Economic Censuses consists of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services, including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies, and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this census but published in a separate series of reports. The 1967 Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufacturers, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

KINDS OF BUSINESS COVERED—The 1967 Census of Selected Services covers the following industries as defined in the Standard Industrial Classification (SIC) Manual: ¹

SIC code	Title
701, 703	Hotels, motels, camps, and trailer parks
72	Personal services
73	Miscellaneous business services
75	Automobile repair, automobile services, and garages
76	Miscellaneous repair services
78	Motion pictures
79	Amusement and recreation services, except motion pictures (excludes nonprofit membership recreational services)

The basic tabulations on Selected Services in this publication are limited to the above classifications. They exclude motion picture theaters operated by the U.S. Department of Defense on military posts. The basic tabulations also exclude data for administrative offices, captive warehouses, and other units which perform supporting service or are auxiliary to service establishments within the same organization. Data for such establishments will be found in tables 12 and 13 of the individual State reports. See the Kind-of-Business Classifications section of Appendix A, General Explanation, for definitions of the kind-of-business categories for which data are shown in this report.

Data were also collected for the following industries and are published in the Subject Reports Series of publication (Series BC67-SS).

SIC code	Title
pt. 4111, ² 4119, ² 413, ⁴	Bus transportation, except school buses ³
421, ³	Trucking, except with storage ³
pt. 4721 ²	Travel agents
8072	Dental laboratories
8111	Legal services
8911	Engineering and architectural services

The following groups of Services Division, as presented in the SIC Manual, are excluded from the scope of this census:

SIC code	Title
702, 704	Rooming houses and organization hotels
80 (exc. 8072)	Medical and other health services, except dental laboratories
82	Educational services
84	Museums, art galleries, and botanical and zoological gardens
86	Nonprofit membership organizations
88	Private households
89 (exc. 8911)	Miscellaneous services, except engineering and architectural services

Symphony orchestras, ballet and opera companies, and similar services organized on a nonprofit basis are included in this census. However, nonprofit establishments operated to provide recreational facilities for their members (part of SIC 79) and whose income is exempt from payment of Federal income tax under the provisions of section 501 of the Internal Revenue Code are not included. Also excluded are services from other divisions of the SIC Manual, other than travel agents (part of Industry 4721) and the specified transportation services of SIC codes 41 and 42.

CENSUS DISCLOSURE RULES—In accordance with Federal law governing census reports, any data which would disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

CORRECTIONS TO DATA—Data in this report comprise the statistical portions of previously published reports. Errors found after such publications were issued have not been carried to this report unless they significantly affect the data. As a result the detail in some tables may not add to totals.

² Of codes 4111 and 4119, only bus transportation is included in scope of the 1967 Census of Selected Services; and of code 4721, only travel agents.

³ Only bus and truck carriers not subject to Interstate Commerce Commission economic regulations are included in the scope of this census.

Appendix A

GENERAL EXPLANATION

CENSUS COVERAGE

Method of Coverage—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 censuses data for all "employer" establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for "non-employers" was obtained from Federal income tax records.

In the 1967 Census of Business, service firms were divided into two categories—the "mail" universe and the "nonmail" universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. The "nonmail" universe—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. All "nonemployers"—Consists of all firms with no paid employment during 1967. Receipts information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, the nonemployer segment accounts for only about 9 percent of selected service receipts. (See "Comparison of the 1963 Census With the 1967 Census," item 4, on next page.)

In the 1967 census, data for all nonemployer establishments were compiled from tax records. In the 1963 census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those service nonemployer firms which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. This treatment is the same as in the 1963 census.

b. Selected "small employers"—"Employers" consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. "Small employers" consist basically of all those single unit firms with payroll below a specified cutoff. The cutoff varied by kind of business and was designed, in most cases, to limit the "nonmail" group to establishments which would account for approximately 20 percent of total receipts in each kind of business. The "number-of-employee" equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on receipts, payroll, and employment for "under cutoff" employer firms were obtained from the

administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. The "mail" universe—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b below) was obtained from IRS and SSA records. The "mail" universe includes the following categories:

a. Firms in the census prec canvass—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 census records of multi-unit firms and larger employers.

b. Firms not in the census prec canvass—Other firms included in the "mail" universe consist of other employers than those covered by section 1-b or 2-a above.

Comparison of the 1963 Census With the 1967 Census

—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. Classification—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for "nonemployer" firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of "employer" and "nonemployer" establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm's description of its principal business activity, greater use was made in 1967 of "basket" classifications (e.g., miscellaneous business services).

The 1967 census classification for the small employer firms (see coverage of employers above) which were not mailed the census report form was based on the following:

a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a "birth" since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedures outlined in a and b above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm's description of its principal business activity as entered on its IRS business tax return was used.

To determine the 1967 census classification for establishments in the mail universe (section 2 above), considerable use was made of "self-designation." However, for kinds of business which posed classification problems, special questions were included to determine the census classification.

In addition to differences in classification based on the method of enumeration, some changes were made in the 1967 census in the individual kind-of-business classifications which are detailed in the "Kind-of-Business Classification" section below.

2. Coverage of nonemployers—Although a comparison of data for nonemployer firms from the 1963 and 1967 censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total service receipts volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms accounting for about one percent of service receipts volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible receipts volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those service nonemployer establishments were included in the census which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. While these are the same rules used in the 1963 census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

3. Payroll—In 1963, the inclusion in payroll of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and payrolls reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

4. Single units and multiunits—In 1963, an establishment was classified as a single unit if operated by a firm which operated only one establishment in a particular kind of business group. An establishment was classified as a multiunit if it was one of two or more establishments in the same general kind of business. For the purpose of the single unit/multiunit classification, special groupings of the "same general kind of business" were established. Establishments of multiunits were classified by establishment size of multiunit. This establishment size classification was retained at all summary levels in the Single Units and Multiunits series of tabulations.

For 1967, an establishment is classified as a single unit or multiunit based on the number of establishments operated by the owning company in the kind-of-business classification, group or total for which data are presented. A single unit operated by a "one-establishment" firm is, of course, a single unit at all levels of tabulation; however, a single unit operated by a "multi-establishment" firm may be classified as a multiunit at broader levels of tabulation. For example, a firm operates three service establishments; a motel, a conventional motion picture theater, and a drive-in motion picture theater. At the most detailed level of classification, each of the establishments is a "single unit operated by a multi-establishment firm." At the (all) motion picture theaters level, it is a "2-establishment multiunit." For selected services, total, it is a "3-establishment multiunit."

A multiunit, or a multi-establishment firm, is a firm with two or more establishments engaged in economic activities. A multi-establishment firm may operate only one establishment classified in selected services.

EXPLANATION OF TERMS

Receipt Size—Tabulations of selected services by receipt size are designated to provide data for 11 receipt size groups for establishments operated the entire year. For the purposes of these tabulations an establishment is classified as "operated entire year" if in operation 10 months or more during the year and in operation at the end of the year. Seasonal establishments which normally operate for only a part of the year are treated as "operated entire year" or "not operated entire year" on the basis of the length of time they are owned rather than the length of time they are open for business during the census year. As the class interval descriptions indicate, establishments are classified by receipt size groups after the reported receipts figures have been rounded to the nearest thousand dollars.

Employment Size—Tabulations of selected services by employment size provide data for 12 employment size groups for establishments operated the entire year. For the purpose of these tabulations, an establishment is classified as "operated entire year" if in operation during the year and if it was in operation at the end of the year. Seasonal establishments which normally operate for only a part of the year are treated as "operated entire year" or "not operated entire year" on the basis of the length of time they were owned rather than the length of time they were open for business during the census year. Proprietors and unpaid family workers are not treated as employees in determining the employment size of an establishment.

Single Units—See "Single units and multiunits" (Section 4) under "Comparison of the 1963 Census With the 1967 Census."

Multiunits—See "Single units and multiunits" (Section 4) under "Comparison of the 1963 Census With the 1967 Census."

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of Business figures represent a summary of reports for individual establishments rather than companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual¹ for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Leased service departments (separately owned businesses operated as departments of another service establishment or of a retail establishment, such as a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store) are treated as separate service establishments in the selected services portion of the 1967 census.

¹ Executive Office of the President, Bureau of the Budget, Standard Industrial Classification Manual, 1967.

Receipts—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1967 whether or not payment was received during 1967. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in performing services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of \$1,000 or more; however, their reported receipts have not been projected to a full year's operation.

Payroll entire year—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

Paid employees for the pay period including March 12, 1967—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

KIND-OF-BUSINESS CLASSIFICATIONS

"Services" as defined in the 1967 edition of the SIC Manual, includes establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories.

The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification." Descriptions of those kinds of business for which data are provided follow.

2. Year-round hotels, with less than 25 guest rooms.
